

GROW UP YOUR BUSINESS WITH US

Solutions for
Aluminium Extrusion

About Us

Since 1981 at service of Aluminium Extrusion Plants, we are highly focused on the development of specific extrusion tools which can concretely facilitate the achievement of excellent results, optimising and bolstering production, quality and energy savings.

Why Choose Us

You can expect to receive only the best of our capabilities with seriousness, consistency and professionalism.

IMPROVE YOUR PRODUCTIVITY AND QUALITY

01

Efficiency

Guaranteed and repeatable results, rapid intervention, proposal of customised solutions for each customer.

02

Professionalism

Remote Training and Support, we accompany our clients following sales and installation, monitoring the use of systems to give target advices.

03

Innovation

State-of-the-art systems for production optimisation and management. Our technicians design new solutions to achieve and maintain excellent quality standards.

optimization management
scrap reduction
detailed reports
exit temperature
short ROI
constant results
liquid nitrogen
technological solutions
REMOTE INSTALLATION
advantages
dies life control
ease to use
performance
productivity
waste reduction
billet temperature
extrusion speed
improvements
product process
ERP interface

INNOVATIVE SOFTWARE EXPERIENCE 4.0

Plant Efficiency

Paperless Production
Planning and Maximization
of Plant Resources.

Productivity

Plant and Scraps
Optimization, Granteed
Extrusion Time Reduction
both with Standard
(**minimum 8%**) or Hard
alloys (**minimum 4%**).

Quality

Best Practice Accompliance
for Automotive Industry with
immediate **Traceability**.

ROI

Immediate and Predictable
Return Of Investment.

Services

Remote Installation, no Side
Technician Needed, Remote
Control of the Full Process
7/24, Data Report Analysis
